

My family and I benefit from listening to XM Satellite Radio and its traffic and weather channels are an EXCELLENT idea....I applaud XM for it's Instant Traffic and Weather. On demand.....instead of going through the FM channels to find an instant traffic or weather announcement....It's raining and windy, I'm wondering if there's a bad weather alert or news I'll need....bad traffic ahead, an exit coming up maybe I should take.....can't find traffic announcement on FM....oh well, I'll sit here and burn fuel for no reason when I could have taken that exit I just passed. We pay for this excellent service, it should NOT be up to the NAB to dictate what we are permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160, please support satellite radio's ability to provide the kind of programming that I demand, on demand, that I and every one else deserve.
